

# Call for a senior researcher position at the INA foundation

The foundation Institute of Nanoscience of Aragón launch an international call for covering a position in the field of “biofunctional nanostructures”.

The call aims to recruit an outstanding scientist with excellent research record in the field of biotechnological application of nanostructures and leadership capabilities.

The achievements in technological transfer and international collaborations already established by the candidate will be highly considered

Candidates already awarded with grant or EU founded projects achieved under high levels of outstanding research values will have preference in the selection process.

The INA Foundation will provide equipped laboratories and offices at the Institute of Nanoscience of Aragón. The contract offered is a full dedication, and undefined term.

The salary will be negotiated accordingly with the researcher’s experience and capabilities of projects attraction.

The candidates should send the CV and a presentation letter to the address below and by e-mail to [ibarra@unizar.es](mailto:ibarra@unizar.es) with the subject “Biofunctional nanostructures position” within the period established by this call.

The applications will be assessed by an evaluation commission.

The selected candidate should incorporate within the period of one month after the resolution of the call. Exceptionally other additional month could be offered.

Publication date: 2nd March 2016

Deadline date: 4th April 2016
